ABSTRACT

This report is one of a series of briefs prepared by the American Institute of Architects National Committee on Architecture for Education addressing ways and means of reducing costs in the design and delivery of educational facilities. Specifically, this report is a useful guide to understanding the relationships between educational philosophy and facility construction. The discussion focuses on the following topics: (1) planning comprehensively for educational facilities; (2) analyzing community educational needs; (3) projecting educational program requisites on the basis of community needs; (4) outlining long-range planning; (5) explaining the fit among educational programs, specifications, philosophy, method, and architecture; (6) explaining the fit between program and educational specifications in space needs and relations; (7) identifying the importance of design perspective; and (8) summarizing past and future trends in educational facilities planning and design.
